

## **Post Op Instructions for:**

### **Temporary Crowns and Bridges**

- **No flossing around the temporary as could catch a ledge and pop it off. Floss everywhere else but there.**
- **Avoid any and all sticky foods as can pull the temporary off.**
- **If for any reason the temporary does come off, the temporary may be resealed with denture powder, for a temporary fix. Moisten inside of temporary, sprinkle with denture powder and seat back on tooth. Contact office to have properly resealed, or if bite needs adjusting. If the temporary is lost, inform us so a new one can be fabricated.**
- **Avoid extreme hot or cold temperatures as these may cause slight sensitivity.**
